- Fronend
- Backend
- Graphic Design
- Video Editing
- UX/UI
- Networking
- IT Support

ABOUT ME

I'm a third-year Management Information Systems student at Setec who genuinely enjoys what I do. I've always been someone who doesn't shy away from hard work — if anything, a good challenge pushes me to do better. Over the years, I've developed a real confidence in public speaking and find it easy to connect with people, whether in a professional meeting or a casual conversation. Building genuine relationships and keeping productive discussions going is something that comes naturally to me. I'm at a point in my studies where I'm excited to take what I've learned and start applying it in meaningful, real-world situations.

CHARACTER AND PERSONALITY

- I am a detail-oriented and hardworking individual who takes my responsibilities seriously and always gives my best effort. I adapt quickly to new environments, tools, and challenges
- whether it's troubleshooting a technical issue or picking up a new technology. Honesty and respect are values I carry into every interaction, and I genuinely enjoy working with people, making communication feel natural and easy for me.
- I am reliable and consistent the kind of person teammates and clients can count on when it matters. I have a real passion for delivering quality service, especially in technical support settings where patience and clear communication make all the difference. In a full-stack development environment, I bring the same dedication
- writing clean work, staying flexible across the stack, and always keeping the end user experience in mind.

WORK EXPERIENCE

Sport Leader — 6 Month

Decathlon Cambodia

(INTERNSHIP AS A SPORT LEADER IN THE HIKING DEPARTMENT)

During my internship at Decathlon Cambodia, I worked as a Sport Leader in the Hiking Department, gaining hands-on experience across a range of store operations. My responsibilities included stock and inventory management, sales, customer service, and cashier duties. I also contributed to store layout modifications to improve the shopping experience and actively engaged with customers to understand their needs and deliver quality service.

IT Support — 6 Month

Cambodia-Korea Cooperation Center (CKCC)

(INTERNSHIP AS A IT SUPPORT)

During my internship at the Cambodia-Korea Cooperation Center, I provided hands-on IT support by diagnosing and resolving technical issues for office computers, ensuring smooth day-to-day operations. Alongside my technical duties, I also contributed creatively by photographing events using both camera and phone, setting up studio spaces, and designing and editing posters for various occasions.
